WORK EXPERIENCE

University of Central Florida

Orlando, FL

Systems Engineer IV (AI Solutions Engineer)

Feb 2026 – Present

- Implemented Portkey Hybrid on Azure Container Apps to provide a centralized gateway and observability for AI model interactions across campus.
- Developed enterprise-grade APIs within Azure APIM to manage access, security, and throttling for various AI-driven services.
- Collaborated on the development of a Model Context Protocol (MCP) server for ServiceNow, creating an autonomous agent for incident creation and assignment.
- Laid the technical foundation for Onyx AI implementation, focusing on scalable RAG (Retrieval-Augmented Generation) infrastructure for university-wide use.
- Transitioned engineering workflows to Agile Sprints to improve project delivery transparency and iterative development.

Cloud Engineer I & II

May 2023 – Feb 2026

- Acted as lead architect of GitHub Enterprise Cloud across 10+ organizations and 400+ repositories, enforcing security and automating DevOps onboarding.
- Engineered identity and financial governance for GitHub via Entra ID (SSO/RBAC) and established chargeback models with usage tracking and budgets.
- Developed GitHub CI/CD pipelines using Terraform (IaC) and Python to manage F5 infrastructure, transforming manual networking into repeatable automation.
- Developed Python automations utilizing APIs to manage various firewalls, narrowing security scope and minimizing vulnerabilities.
- Migrated 400+ VMs to Azure, addressing firewall rules, hardening cloud security posture, and automating configurations.

Cloud Engineering Intern

March 2022 – May 2023

- Supported business operations by maintaining virtual machines and networking in a hybrid cloud environment.
- Leveraged Python and APIs to assist in creating automations and cloud solutions for campus infrastructure.

Engineering and Computer Simulations

Orlando, FL

IT Support

May 2021 – March 2022

- Conducted risk assessments and ensured compliance with cybersecurity frameworks, including NIST SP 800-171 and CMMC 2.0 standards.
- Leveraged ITIL best practices to troubleshoot workstations and equipment in person and remotely.

PERSONAL GROWTH

Automation Volunteer — Antioch Community Church Orlando

May 2020 – Present

- Developed Python automations for volunteer scheduling and engineered ETL solutions for seamless congregant data transfer between church systems.

Home Lab

Oct 2022 – Present

- Engineered a segmented network environment utilizing four VLANs with tailored firewall rules to mitigate lateral movement risks.
- Performed hands-on security exercises using VMs running Kali Linux and Metasploitable to practice vulnerability assessment and penetration testing.

SKILLS

Certifications: Microsoft Certified: Azure Fundamentals (AZ-900); Azure Administrator Associate (AZ-104 - Expected Dec 2025)

Languages: Python, HCL/Terraform, Bash, Git, YAML, PowerShell, SQL

Applications: Azure (Container Apps, APIM), Portkey, MCP, GitHub Enterprise, NSX, vSphere, ServiceNow

DevOps: GitHub Actions, CI/CD, Infrastructure as Code (IaC), Secure Pipeline Automation, Agile/Sprints

EDUCATION

University of Central Florida

Orlando, FL

M.S. in Cyber Security and Privacy

2024 – In Progress (15/30 credit hours completed)

B.S. in Information Technology, Minor in Secure Computing and Networks
