WORK EXPERIENCE

-
- | | |
|---|-----------------------|
| University of Central Florida | Orlando, FL |
| <i>Systems Engineer IV (AI Solutions Engineer)</i> | Feb 2026 – Present |
| <ul style="list-style-type: none">Architected and deployed Portkey Hybrid on Azure Container Apps, configuring Entra ID SSO/SCIM via Enterprise Application and managing configuration through Terraform IaC—establishing a centralized AI gateway for LLM orchestration and observability across campus AI services.Engineered enterprise-grade APIs in Azure API Management (APIM) enforcing access control, security policies, and rate throttling for AI-driven services, enabling governed LLM consumption at scale.Architected Azure Container Apps infrastructure for a Model Context Protocol (MCP) server, enabling the team to deploy an autonomous ServiceNow agent for LLM-driven incident triage and assignment.Serve as primary Azure infrastructure architect for AI initiatives, translating team requirements into IaC and CI/CD deployments across Container Apps, APIM, and Entra ID—accelerating delivery of AI-adjacent services. | |
| <i>Cloud Engineer I & II</i> | May 2023 – Feb 2026 |
| <ul style="list-style-type: none">Acted as lead architect of GitHub Enterprise Cloud across 10+ organizations and 400+ repositories, spearheading DevOps onboarding initiatives and enforcing security across the development environment.Engineered identity and financial governance for GitHub via Entra ID (SSO/SCIM/RBAC) and established a charge-back model with usage tracking and budgets.Sole developer of a GitHub Actions CI/CD pipeline managing F5 infrastructure via Terraform (Infrastructure as Code), leveraging Python to dynamically transform data into repeatable automation patterns.Built Python automations utilizing APIs to govern various firewalls, significantly reducing rule complexity, narrowing security scope, and minimizing vulnerabilities. | |
| <i>Cloud Engineering Intern</i> | March 2022 – May 2023 |
| <ul style="list-style-type: none">Managed virtual machines in vSphere and supported hybrid cloud networking, playing a key role in migrating 400+ VMs to Azure and remediating NSX firewall rules.Leveraged Python and APIs to build automations and cloud solutions for campus infrastructure. | |
| Engineering and Computer Simulations | Orlando, FL |
| <i>IT Support</i> | May 2021 – March 2022 |
| <ul style="list-style-type: none">Conducted risk assessments and ensured compliance with cybersecurity frameworks, including NIST SP 800-171 and CMMC 2.0 standards.Leveraged ITIL best practices to troubleshoot workstations and equipment in person and remotely. | |

PERSONAL GROWTH

-
- | | |
|--|--------------------|
| Automation Volunteer Antioch Community Church Orlando | May 2020 – Present |
| <ul style="list-style-type: none">Developed Python automations for volunteer scheduling and engineered ETL solutions for seamless congregant data transfer between church systems. | |
| Home Lab | Oct 2022 – Present |
| <ul style="list-style-type: none">Engineered a segmented network environment utilizing four VLANs with tailored firewall rules to mitigate lateral movement risks.Performed hands-on security exercises using VMs running Kali Linux and Metasploitable to practice vulnerability assessment and penetration testing. | |

SKILLS

Certifications: Microsoft Certified: Azure Fundamentals (AZ-900)
Languages: Python, HCL/Terraform, Bicep, Bash, Git, YAML, PowerShell, SQL
Applications: Azure, GCP, AWS, Portkey, LLM Orchestration, MCP, GitHub Enterprise, NSX, vSphere, ServiceNow
DevOps: GitHub Actions, CI/CD, Infrastructure as Code (IaC), Secure Pipeline Automation, Agile/Sprints

EDUCATION

University of Central Florida	Orlando, FL
M.S. in Cyber Security and Privacy	2024 – In Progress (15/30 credit hours completed)
B.S. in Information Technology, Minor in Secure Computing and Networks
